DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George Likourezos on 05/28/09.

The application has been amended as follows:

Claims 3 and 8 are canceled.

Claim 1. (Currently Amended) A system for scrolling through a document, comprising: presentation means for presenting at least a part of a document on a display screen, said part being determined by a position of a focal point within the document and by a zoom factor with respect to at least one coordinate direction,

the presentation means being capable of adjusting the position of the focal point in response to a user-supplied scroll command,

said presentation means being adapted to automatically adjust the zoom factor (i) in dependence upon an aspect of said scroll command and (ii) when the focal point approaches an edge of the display screen and remains on the edge of the display screen for a predetermined period of time, wherein a relatively large adjustment of the position of the focal point in a certain coordinate direction causes a zooming-out of said document in at least said coordinate direction.

Art Unit: 2173

Claim 6. (Currently Amended) A method of scrolling through a document, comprising:
a presentation step of presenting at least a part of the document on a display screen by a processing unit, said part being determined by a position of a focal point within the document and by a zoom factor with respect to at least one coordinate direction,

the method further comprising a step of:

adjusting the position of the focal point in response to a user-supplied scroll command, said presentation step being adapted to automatically adjust the zoom factor (i) in dependence upon an aspect of said scroll command and (ii) when the focal point approaches an edge of the display screen and remains on the edge of the display screen for a predetermined period of time, wherein a relatively large adjustment of the position of the focal point in a certain coordinate direction causes a zooming-out of said document in at least said coordinate direction.

Allowable Subject Matter

Claims 1-2, 4-7 and 9-11 are allowed over the prior art of record.

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are adjusting the position of the focal point in response to a user-supplied scroll command, said presentation step being adapted to automatically adjust the zoom factor (i) in dependence upon an aspect of said scroll command and (ii) when the focal point approaches an edge of the display screen and remains on the edge of the display screen for a predetermined period of time, wherein a relatively large adjustment of the position of the focal point in a certain coordinate direction causes a zooming-out of said

Art Unit: 2173

document in at least said coordinate direction. These features are not found or suggested in the prior art.

The closest prior arts, Hinckley and Kelts discloses a conventional a navigation interface display system that generates a navigation map that organizes a plurality of information sources and a map that can be navigated and traversed, and the user may engage navigation bar for purposes of zooming and panning; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
